Dear Alan

Many thanks for all the hard work you have done in converting our vans to gas. I have to say after years of indifference and scepticism, I think it is one of the best things as a company we have ever done and would highly recommend such a change to anyone with or without a large fleet. The same goes for anyone with a petrol car – you will save yourself a bundle!

Whilst the price of diesel continues to increase it is sobering to know that the price of gas continues to stay low and we continue to save hundreds of pounds!

Yours Sincerely,

Alex Small, Company Director
